POSITION AVAILABLE

Title: Mathematics and Equity Professional Developer

Salary Range: \$62,532 – \$76,872

Duties and

Responsibilities: The Center for Mathematics Excellence and Equity at the Lawrence Hall of Science designs and implements professional development programs and curriculum that advance equity and access in mathematics in K–16 schools, collaborates with external equity and mathematics experts, and conducts applied research to inform its programs and practices. The appointee will fill the position of Mathematics and Equity Professional Developer. In this capacity the appointee will: Design and deliver professional development programs and Institutes on equity in mathematics; lead and manage related professional development projects; collaborate with internal partners in designing and conducting applied research related to equity in mathematics; collaborate with external clients and expert/research partners; prepare relevant reports; design and coordinate activities that ensure the successful implementation of professional development programs at a school or district; lead and support the development of new projects; develop proposals for funding future work; supervise graduate students, staff, or other academics in the delivery of the professional development or research programs; present and publish the Center’s work in academic and professional venues; and contribute to the development of the Center.

Qualifications: MA or PhD in Mathematics preferred. 10 years or more of teaching experience or equivalent. Expertise in design and implementation of professional development programs and curriculum in equity in mathematics. Ability to work with multiple clients in a variety of settings. Expertise in project management. Experience supervising others desirable. Fluency in a second language desirable. Excellent written and verbal communications skills. Experience working collaboratively in K-16 educational programs.

Approximate
